

EFRAÍN SEBASTIÁN ROJAS ARTAVIA

Junior Software Developer | IT Analyst | Cloud & Automation

+506 8890-2804 | efrabuild@outlook.com | [efrabuilder.github.io](https://github.com/efrabuilder) | github.com/efrabuilder
Atenas, Alajuela, Costa Rica

PROFESSIONAL SUMMARY

Detail-oriented Computer Engineering student (UNED) and certified RPA Developer with hands-on experience in network monitoring, incident management, and process automation. Holds a Google Cloud Cybersecurity Certificate and Google Cloud Computing Foundations Certificate (2026) with practical skills in cloud security, threat detection, IAM, and cloud infrastructure. Experienced with Python, JavaScript, React, Next.js, C#, and Java through academic projects and production environments. Eager to contribute as a Junior Developer, IT Analyst, or Intern, bringing a fast-learning mindset, strong documentation habits, and a genuine passion for building reliable software and systems.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, C, C++, C#, Java, HTML, CSS

Frameworks & Libraries: React, Next.js, Node.js, REST APIs

Cloud & Infrastructure: Google Cloud Platform (Compute Engine, Cloud Storage, Cloud Functions, BigQuery, Dataproc, GKE, Cloud Run, App Engine, VPC, Cloud Armor, IAM)

Databases: SQL, relational database design

Networking: TCP/IP, DNS, VPN, Zabbix, OLT, WinBox, Unifi, GNS3, routers & switches

Automation & RPA: UiPath Studio, Microsoft Power Automate, Power Apps

DevOps & Version Control: Git, GitHub, CI/CD basics, Linux (Ubuntu/Debian), Windows Server

Tools: VS Code, Power BI, Microsoft Office 365, Google Workspace, Odoo, Vercel, Railway

AI Tools: ChatGPT, Claude (Anthropic), Gemini, GitHub Copilot, Perplexity — applied for code assistance, technical research, documentation, and workflow optimization

Soft Skills: Problem-solving, root cause analysis, technical documentation, cross-functional collaboration, attention to detail, adaptability

PROFESSIONAL EXPERIENCE

NOC Technician — Vocex

San José, Costa Rica | Dec 2025 – Jan 2026

- Monitored network infrastructure (routers, switches, OLT) for multiple ISP clients using Zabbix, maintaining real-time visibility across production environments.
- Diagnosed and resolved network incidents and service outages, applying structured troubleshooting methodologies to reduce mean time to resolution (MTTR).
- Escalated complex incidents to Tier 2/3 engineers and field technicians, ensuring SLA compliance and uninterrupted service delivery.
- Documented tickets end-to-end in incident management systems, coordinated with vendors, and generated daily performance and incident reports.
- Applied technical communication skills to bridge NOC teams and ISP clients, translating technical issues into clear status updates.

Production Operator I — Confluent Medical

Alajuela, Costa Rica | Jan 2025 – Sep 2025

- Operated and monitored production equipment in an ISO-certified cleanroom environment, maintaining zero critical deviations across full tenure.
- Collaborated cross-functionally with quality and engineering teams to meet production targets and reduce equipment downtime.
- Produced detailed deviation logs and shift reports, applying the same data accuracy and documentation discipline valued in IT and software roles.

EDUCATION

B.S. in Computer Engineering (Ingeniería Informática) — In Progress

UNED — Universidad Estatal a Distancia, Costa Rica | 2025 – Expected 2029

Relevant coursework: Algorithms & Data Structures, Operations Research, Object-Oriented Programming, Databases, Computer Networks.

Technical Diploma in Information Technology

UNED — Universidad Estatal a Distancia, Costa Rica | 2023 – 2025

High School Diploma

Liceo de Atenas | 2014 – 2018

CERTIFICATIONS

Google Cloud Cybersecurity Certificate — Google Cloud | 2026

Cloud security, threat detection, cyber threat intelligence, IAM, data protection, network security, compliance lifecycle, disaster recovery, and incident response. Prepares for cloud security analyst and cybersecurity specialist roles.

Google Cloud Computing Foundations Certificate — Google Cloud | June 2026

Cloud infrastructure, APIs, BigQuery, Compute Engine, Cloud Storage, IAM, Dataproc, Network Security, serverless and cloud-native application development.

RPA Developer Diploma — UiPath Academy | 2025

Robotic process automation design, development, and deployment using UiPath Studio; workflow automation, bot orchestration, and process analysis.

Junior Cybersecurity Analyst Career Path — Cisco | July 2026

Application security, cloud security, firewalls, access controls, network hardening, defense-in-depth, system & endpoint protection, threat mitigation, Windows & Linux security, securing WLANs, and IP/TCP/UDP vulnerability awareness.

Cyber Threat Management — Cisco | July 2026

Threat modeling, risk management, incident response planning, vulnerability assessment, and cybersecurity governance frameworks.

Network Defense — Cisco | July 2026

Network defense strategies, IDS/IPS, access control, firewall management, traffic analysis, and network security monitoring.

Network Technician Career Path — Cisco | July 2026

Network installation, configuration, troubleshooting, and support across LAN/WAN environments; validates hands-on NOC and infrastructure experience.

Introduction to Cybersecurity — Cisco | July 2026

Cybersecurity fundamentals: attack types, defense strategies, personal and organizational data protection, and career pathways in security.

Networking Basics — Cisco | July 2026

TCP/IP networking fundamentals, IP addressing, network protocols, media types, and basic network device configuration.

Data Analytics Essentials — Cisco | July 2026

Data analysis, data visualization, data storytelling, and dashboard design. Applied tools: Tableau, Excel, and SQL for end-to-end analytics workflows.

Certificate of Achievement — Podcast Production Workshop — Educación a Distancia CR | June 2026

8-hour workshop covering podcast production fundamentals, audio content creation, and digital publishing. Published episode available at: go.ivoox.com/sq/3188780

PROJECTS & PORTFOLIO

Portfolio: efrabuilder.github.io | GitHub: github.com/efrabuilder

- Built a bilingual (ES/EN) personal portfolio with dark theme using React and Next.js, deployed on GitHub Pages — demonstrates front-end development, responsive design, and deployment workflows.
- Developed and deployed full-stack web applications on Railway and Vercel using Next.js, React, and Node.js, including REST API integration.
- Completed 8+ public projects spanning backend scripting (Python, C), object-oriented design (Java, C#), and modern front-end (React, Next.js) — all documented on GitHub.

- Completed extensive hands-on labs on Google Cloud Skills Boost covering Dataproc, Dataflow, GKE, Cloud Run, App Engine, VPC networking, Cloud SQL, and Cloud Armor.
