Atenas, Alajuela, Costa Rica

PROFESSIONAL SUMMARY

Versatile Computer Engineering student (UNED) with a strong portfolio of industry certifications spanning cloud architecture (Oracle OCI, Google Cloud), cybersecurity (Cisco, Splunk), data analytics (Tableau, SQL, Power BI), and software development (Python, JavaScript, React, C++, Java). Holds a Technical Diploma in IT (UNED), RPA Developer Diploma (UiPath), and 15+ professional certifications across Google Cloud, Oracle, Microsoft Azure, and Cisco. Hands-on experience in network infrastructure monitoring (NOC), incident management, and process automation in production environments. Adaptable, fast-learning, and committed to continuous growth. Seeking entry-level or junior roles in software development, IT, cloud, data, or cybersecurity.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, C, C++, C#, Java, HTML, CSS

Frameworks & Libraries: React, Next.js, Node.js, REST APIs

Cloud Platforms: Google Cloud Platform (Compute Engine, Cloud Storage, BigQuery, GKE, Cloud Run, IAM, Cloud Armor, VPC) | Oracle OCI (VCN, Compute, Storage, IAM, Load Balancer) | Microsoft Azure (AZ-305, AZ-500 fundamentals)

Cybersecurity: SOC operations, Splunk SIEM, threat detection, threat hunting, Cyber Kill Chain, IDS/IPS, firewalls, network hardening, vulnerability assessment, ethical hacking, endpoint security, cloud security

Data & Analytics: SQL, Tableau, Power BI, BigQuery, Dataproc, Dataflow, data pipelines, data visualization, data storytelling, TensorFlow basics

Automation & RPA: UiPath Studio, Microsoft Power Automate, Power Apps

Networking: TCP/IP, DNS, VPN, Zabbix, OLT, WinBox, Unifi, GNS3, routers & switches, network protocols

DevOps & Version Control: Git, GitHub, CI/CD basics, Linux (Ubuntu/Debian), Windows Server

Tools: VS Code, Tableau, Power BI, Microsoft Office 365, Google Workspace, Vercel, Railway, Odoo

AI Tools: ChatGPT, Claude (Anthropic), Gemini, GitHub Copilot, Perplexity — code assistance, research, documentation, workflow optimization

Soft Skills: Problem-solving, root cause analysis, technical documentation, cross-functional collaboration, attention to detail, adaptability

PROFESSIONAL EXPERIENCE

NOC Technician — Vocex

San José, Costa Rica | Dec 2025 – Jan 2026

- Monitored network infrastructure (routers, switches, OLT) for multiple ISP clients using Zabbix, maintaining real-time visibility across production environments.
- Diagnosed and resolved network incidents and service outages applying structured troubleshooting methodologies, reducing mean time to resolution (MTTR).
- Escalated complex incidents to Tier 2/3 engineers with full technical context, ensuring SLA compliance and continuity of service.
- Documented tickets end-to-end in incident management systems, coordinated with vendors, and generated daily performance and incident reports.
- Applied technical communication skills to bridge NOC teams and ISP clients, translating technical issues into clear status updates.

Production Operator I — Confluent Medical

Alajuela, Costa Rica | Jan 2025 – Sep 2025

- Operated production equipment in an ISO-certified cleanroom, maintaining zero critical deviations across full tenure.
- Collaborated with quality and engineering teams to meet production targets and reduce equipment downtime.

- Produced detailed deviation logs and shift reports, applying precision documentation habits valued in IT and software roles.

EDUCATION

B.S. in Computer Engineering — In Progress

UNED — Universidad Estatal a Distancia, Costa Rica | 2025 – Expected 2029

Relevant coursework: Algorithms & Data Structures, Operations Research, OOP, Databases, Computer Networks.

Technical Diploma in Information Technology

UNED — Universidad Estatal a Distancia, Costa Rica | 2023 – 2025

High School Diploma

Liceo de Atenas | 2014 – 2018

CERTIFICATIONS

Full badge portfolio: credly.com/users/efrain-rojas-artavia

Oracle Cloud Infrastructure Certified Architect Associate — Oracle | July 2026

OCI IAM, VCN, Compute, Autoscaling, Object/Block/File Storage, Load Balancer, DNS. Valid through July 2028.

Google Cloud Cybersecurity Certificate — Google Cloud | 2026

Cloud security, threat detection, IAM, data protection, network security, compliance, incident response.

Google Cloud Computing Foundations Certificate — Google Cloud | June 2026

Cloud infrastructure, APIs, BigQuery, Compute Engine, Cloud Storage, IAM, Dataproc, cloud-native development.

RPA Developer Diploma — UiPath Academy | 2025

Automated workflow design, bot development, orchestration, and process analysis using UiPath Studio.

Cybersecurity Defense Analyst Career Path — Cisco & Splunk | July 2026

SOC, threat detection, Splunk SIEM, Cyber Kill Chain, threat hunting, big data analysis, security monitoring.

Junior Cybersecurity Analyst Career Path — Cisco | July 2026

Application security, cloud security, firewalls, endpoint protection, network hardening, defense-in-depth.

Cyber Threat Management — Cisco | July 2026

Threat modeling, risk management, vulnerability assessment, incident response, governance frameworks.

Ethical Hacker — Cisco | July 2026

Penetration testing, ethical hacking methodology, vulnerability scanning, social engineering, cryptography.

Network Defense — Cisco | July 2026

Network defense strategies, IDS/IPS, firewall management, traffic analysis, security monitoring.

Network Technician Career Path — Cisco | July 2026

Network installation, configuration, troubleshooting, LAN/WAN support.

Endpoint Security — Cisco | July 2026

Endpoint protection, antimalware, host-based intrusion prevention, system hardening.

Data Analytics Essentials — Cisco | February 2026

Data analysis, visualization, storytelling, dashboards. Tools: Tableau, Excel, SQL.

Introduction to Data Science — Cisco | January 2026

Data science workflow, data collection, analysis, and validation.

Python Essentials 1 & 2 — Cisco | July 2026

Python: data structures, OOP, scripting, file handling, exceptions.

JavaScript Essentials 1 & 2 — Cisco | July 2026

JavaScript fundamentals to advanced: DOM, ES6+, async, web APIs.

Introduction to Cybersecurity — Cisco | July 2026

Cybersecurity fundamentals, attack types, defense strategies, data protection.

Networking Basics — Cisco | July 2026

TCP/IP, IP addressing, network protocols, basic device configuration.

PROJECTS & PORTFOLIO

Portfolio: efrabuilder.github.io | GitHub: github.com/efrabuilder

- Built a bilingual (ES/EN) personal portfolio with React and Next.js, deployed on GitHub Pages — front-end development, responsive design, and CI/CD deployment.
- Developed and deployed full-stack web applications on Railway and Vercel using Next.js, React, Node.js, and REST APIs.
- Completed 8+ public GitHub projects: Python scripting, C/C++ algorithms, OOP design (Java, C#), modern front-end (React, Next.js).
- Completed 20+ Google Cloud Security labs: Security Command Center, Cloud Armor, IAM, Cloud KMS, VPC, XSS remediation, firewall configuration.
- Applied Splunk SIEM and data analytics tools (BigQuery, Tableau, Power BI) in coursework and lab environments.
- Built and deployed RPA automations with UiPath Studio including multi-step workflows, exception handling, and execution logging.
